Leverage internet technology to automate and enhance your business processes

Our vision of today's enterprise is one underpinned by internet technology enabling versatile working for your staff whilst ensuring that your company is always open for business.

Partnered with the UK's leading internet business provider, we offer a suite of internet solutions that 'just work', from Blackberry services and global office connectivity through to hosted email services. Managed and maintained 24 hours a day, we can seamlessly manage both your local and wide area networks, including your servers, connectivity and security.

ISP Services

One single point of contact for all of your internet services

With one point of contact and regular quality of service reports, you can be confident that your internet solutions are managed and automatically monitored by our qualified engineers. We are able to supply and manage connectivity ranging from ADSL through to a leased line, all with backup internet connections. Our data centre (NOC) supports a range of hosting solutions; we can act as the hub of your infrastructure, delivering scalability, bandwidth and reliability. Co-location of your business critical servers (primary or backup) means seamless protection against failure.

Benefits

- A total managed solution: one contact for all internet services means improved response and resolve times
- Mobile worker solutions mean improved productivity and a better service for your customers
- Secure VPNs easily enable home and remote working, leading to a better work / life balance and the ability to tap into diverse talent, such as part time and home workers
- Our Internet Services leverage the power of technology to automate and enhance your business processes

About us

If you view IT as an investment – rather than a cost – you'll be looking for a strategic IT partner that thinks in the same way. Supporting UK and international businesses 24 x 7 x 365, The Internet Group is based in London, with co-location facilities in Birmingham and New York. Our team is composed of over 35 Microsoft and Cisco trained professionals, and in 2010 we were named as the "IT Service Excellence Supplier of the Year" by the Service Desk Institute.
