DEVELOPMENT

The best performing companies have the best performing networks. A Network Audit provides a forensic analysis of your network.

An Internet Group Network Audit is a comprehensive examination of your entire IT infrastructure: from the reliability of your backups, hardware utilisation and software licensing, to internet connectivity and legal compliance.

Each audit provides you with a plain English breakdown of the inherent strengths and weaknesses of your network, a thorough analysis of any security risks, and detailed recommendations for the future development of your information systems. We will invite you into our offices to discuss our findings; an Internet Group Network Audit is a personalised solution designed to give you complete understanding of your IT systems and peace of mind. For many companies, a Network Audit is the first step to defining and delivering a strategic IT vision for their enterprise.

## Network Audit

### Most comprehensive available

We will provide you with a detailed review of every component within your IT infrastructure, including your assets, your connectivity right through to an evaluation of your cabling.

As part of the audit, we will silently install a probe onto your network that allows us to evaluate the effectiveness of your IT infrastructure at a granular level. This approach is unique to us at TIG and is one of the many reasons why our clients highly recommend our audits.

### Benefits

- A thorough and comprehensive overview of your network in plain English together with an unique scoring system
- A first step to creating a disaster recovery plan i.e. a comprehensive manual of your company's IT and how it works
- Gauge the effectiveness of your existing suppliers or in-house IT team
- Identify threats, highlight weaknesses and ensure compliance before they cause costly downtime
- Our qualified consultants will identify opportunities that will enhance the way you work and reduce your annual IT expenditure
- A logical IT roadmap to develop and protect your network and your business

### About us

If you view IT as an investment – rather than a cost – you'll be looking for a strategic IT partner that thinks the same way. Supporting UK and international businesses 24 x 7 x 365, The Internet Group is based in London, with co-location facilities in Birmingham and New York. Our team is composed of over 35 Microsoft and Cisco trained professionals, and in 2008 we were named as the Best Place to Work in IT Services by Computer Weekly.
