DEVELOPMENT

Peace of mind 24x7x365 for enterprises of all sizes.

Network Management entails the remote management and monitoring of your entire network, including hardware, software and connectivity. Our solutions are based around our enterprise-class predictive monitoring platform (PMP) which provides granular, real-time information on the performance of your entire network - from server processing capacity to a printer running low on ink.

As well as protecting your systems, we provide email and telephone support to your user base: every day and every minute of the year. Our friendly, qualified engineers who are employed exclusively by us and based in the UK, will already have a deep understanding of your network through our renowned audit program, meaning issues are solved quickly and efficiently, with a minimum impact to your working time.

## Network Management

### Management of your entire enterprise, not just your IT

Automatic monitoring and implementation of all security updates and patches. Regular reporting including quality of service and management information. As a Symantec partner we are able to offer complete network protection solutions including automated, daily management of your antivirus, spyware and backups. Network Management also includes management of all third party suppliers: we resolve vendor issues on your behalf.

#### Benefits

- Peace of mind that your network is being managed by qualified professionals
- Proactive monitoring means we solve problems before they even happen
- Eliminates expensive and frustrating downtime
- Guaranteed Business Enhancement through the use of IT
- Ensure data protection and legal compliance

#### About us

If you view IT as an investment – rather than a cost – you'll be looking for a strategic IT partner that thinks in the same way. Supporting UK and international businesses 24 x 7 x 365, The Internet Group is based in London, with co-location facilities in Birmingham and New York. Our team is composed of over 35 Microsoft and Cisco trained professionals, and in 2010 we were named as the "IT Service Excellence Supplier of the Year" by the Service Desk Institute.
